Grevillia Grove, Nairobi, Kenya

## SUMMARY

A driven professional in the technology field with an extensive background in data analytics, database management and programming. This background includes working with a variety of teams to provide consistent insights and excellent project outcomes. Known for the ability to work in managing the fine line between what the customer needs and what is best for the project for the team. A good performer in a timely manner with minimal difficulty in adjusting to changing work environment. Experienced in SQL and other software that are required for the analysis of big data. I am self motivated, and a better than ordinary manager, and I am ready and eager to accomplish the goals of your organization.
